RE: XTREME THREADS

After dealing with many other suppliers for our uniform and clothing needs, I came across the work of Xtreme Threads through my son's lacrosse team. We began with changing up the style of our simple spring flag football jerseys, that had historically been two shirts, one dark, one light, to an innovative reversible pinnie style. This was a huge benefit to our association not only from a price point, but the designs that Connor put together were really cutting edge when it comes to the football league. This also helped us keep player more organized by only having to carry one shirt rather than multiple, and way easier to change over from game to game.

After our initial order, I've constantly tried to find ways to utilize Xtreme as Connor has always been so very prompt and diligent when it comes to design, ordering and delivery of products. As we understand, when dealing with hundreds of shirts, or shorts or anything at a time, logistics can be a big challenge, but Connor and his team always have things extremely organized for us and most importantly on time.

We have since grown our engagement this year to put together all our tackle football jerseys with Xtreme threads and could not have been happier with the outcome. We put together 12 different teams with 6 or more different designs, and all turned out fabulous. Our players are the envy of the league.

The most amazing thing I find, is that when I make mistakes ordering, weather it name, number, size or design, Connor is extremely efficient in getting corrected items out as well, which has been a true blessing in several situations.

Thank you very much Connor and Team for all you do for the Chilliwack Giants, we really look forward to expanding our work with you into the future. We also take every opportunity to share our experiences with other teams, and will continue to do so, highly recommended.

Sincerely,

**Colin M. Boyd**

Vice President

Chilliwack Minor Football Association
